

# MASTAAN RANDHAWA

Surrey, BC | msr12@sfu.ca | 604-367-8091 | [www.mastaanrandhawa.com](http://www.mastaanrandhawa.com)

## SKILLS

**Technical Skills** - Python, C/C++, Assembly, JavaScript, HTML/CSS

**Frameworks** - Bootstrap, ReactJS, ThreeJS, SpringBoot, TailWind

**Others** - Git, MongoDB, MySQL/SQL/SQLite, Figma, Render, Docker, AWS, REST API

## PERSONAL PROJECTS

### Website Template

December 2024 - Present

- Developed a modern, responsive template tailored for churches, using React and AWS for seamless deployment.
- Leveraged Tailwind CSS for efficient styling and responsiveness.
- Integrated React to enhance interactivity and improve user experience.

### ASIDESTUDIOS.CA

January 2025 - Present

- Designed a barber website with an intuitive interface using Tailwind CSS for styling and AWS for hosting.
- Developed features for seamless appointment booking and real-time updates to enhance user convenience.
- Built backend functionality with REST APIs for efficient data management and integration.

### AKWRAPS.CA

June - September 2024

- Developed a web service for a car wrapping business using JavaScript, alongside ThreeJS for 3D visualizations.
- Utilized Thymeleaf for server-side rendering and Docker for streamlined deployment processes.
- Integrated responsive design and interactivity to enhance user engagement.

## TECHNICAL PROJECTS

### RISC-V Processor

September - December 2023

Operating Systems (CMPT 295), SFU

- Developed a RISC-V processor to explore how processors execute instructions at the hardware level.
- Implemented custom SLT-type instructions using C/C++/Assembly to extend base functions.
- Produced and decoded output for a concise representation of executed instructions.

### Multi-level Cache System

September - December 2023

Operating Systems (CMPT 295), SFU

- Designed and managed multi-level cache systems to address challenges in reducing cache misses and latency.
- Implemented advanced caching functions using C/C++, including LRU and LFU eviction algorithms.
- Optimized memory allocation with dynamic data structures to efficiently manage cache sets, lines, and blocks.

## EXPERIENCE

### Executive

November 2023 - Present

Google Developers Student Club, Burnaby, BC

- Led tech initiatives and created solutions aligned with the club's vision, to equip peers with new skills.
- Organized workshops to build skills and foster a collaborative tech community.
- Coordinated projects to ensure innovative and impactful outcomes.

## OTHER WORK

### Vision Centre Associate

June 2021 - Present

Walmart, New Westminster, BC

- Collaborated with optometrists and team to deliver optical solutions, ensuring seamless patient care.
- Communicated complex eyewear details with clarity to help customers make informed decisions.
- Resolved customer needs by aligning products (e.g., blue-light lenses, transitions) to their prescriptions.

## EDUCATION

### BSc. Degree Computer Science

June 2022 - Present

Simon Fraser University, Burnaby, BC
